Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments and amendments, filed 11/1/02, have been fully considered and reviewed by the examiner. In light of the amendments, the objections to the specification and claims have been withdrawn by the examiner. The examiner acknowledges the addition of Claim 25. Claims 1-25 are pending.

The applicant has argued that the Izaki reference does not teach the newly recited limitation that the palladium be omitted, as Izaki clearly teaches catalyzing the surface with palladium. The examiner is not persuaded by the applicant's argument as there is no requirement in the claims that palladium be excluded from the process completely or that silver be the only catalyzing substance. The claims, as presently recited, merely require that after contact with the silver salt solution, the surface be substantially free of palladium. Izaki teaches this feature, as Izaki teaches activation with palladium after activation with the silver salt solution. Thus, Izaki teaches a process in which the surface would be substantially free of palladium after the silver salt solution application, which is then further electrolessly plated, which meets the claim requirements. The claims do not exclude a palladium treatment step between the silver salt activation and the electroless plating step. Therefore, it is the examiner's position that the Izaki reference is still applicable to the claimed invention.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-6 and 10-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Izaki et al.

Izaki et al. is applied here for the same reasons as given above and in paragraph 4 of the previous office action.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Izaki et al. as applied to claim 5 above, and further in view of Pendleton.

Izaki et al. and Pendleton are applied here for the same reasons as given above and in paragraph 6 of the previous office action.

Art Unit: 1762

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Izaki et al. as applied to claim 5 above, and further in view of Stamp et al.

Izaki et al. and Stamp et al. are applied here for the same reasons as given above and in paragraph 7 of the previous office action.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
